GB - 400W Fog Machine

Please read this manual thoroughly and adhere to the instructions in order to avoid any danger or damage due to misuse.

The appliance is only to be used with the recommended vaporizing medium. The use of other substances may give rise to a toxic or fire risk.

This appliance shall not be used by children below the age of 14 nor persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge even if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children.

Please note that the unit is not for intensive professional use. FOR SAFETY REASONS, DO NOT LEAVE THE UNIT SWITCHED ON OVER AN EXTENDED PERIOD OF TIME.

Attention:

- Please adhere to all operation, safety and repair instructions to avoid getting an electric shock and keep the unit in excellent working condition.
- Keep the unit clean For indoor use only
- Make sure your mains outlet delivers the voltage required for this fog machine. Put the unit on a level surface and don't tilt or turn it upside down.
- Power off or pull out plug after use.
- If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid hazard.
- The unit is not waterproof, if there is some humidity, water or fog liquid in it, please switch off the power and contact the distributor as soon as possible.
- There are no spare parts inside machine. If the unit needs to be repaired, please contact your dealer of an experienced technician.
- Keep out of the reach of children. Don't leave the unit unattended when children are present. Don't spray the fog directly to people and into an open flame.
- The nozzle becomes very hot during operation. So please leave at least 1m distance between the unit and other materials.
- Put the machine at a well-ventilated place and don't cover the ventilation holes. Leave at least 1m of space around the fog machine. Keep a distance of at least 3m between the fog machine and inflammable materials. Don't add tinder liquid such as oil, gas, perfume and etc. in fog machine.
- Please use high quality fog liquid recommended by your dealer. Bad quality fog liquid may damage the unit. Check regularly if there is enough fog liquid left in the tank.

- Remove all fog liquid from the unit before transport.
- Don't swallow fog liquid. In case of accidental ingestion, contact immediately a doctor. Rinse thoroughly your skin and eyes if they have been in contact with the fog liquid.

Installation:

1. Take away all packing material especially in the nozzle.
2. Set the unit on a level surface and loosen the cap of the fluid tank.
3. Add high quality water based fog liquid in the machine and screw the cap of the fluid tank. Bad quality fog liquid will damage fog machine.
4. Plug the unit into an earthed mains outlet.

Operation:

1. Please turn on the unit via the switch on the rear panel. The machine will start heating up. Set the I/O switch on the remote to "I" to start the fog machine. When it has reached operating temperature, the neon switch on the remote control lights up. Occasionally the neon switch will turn off and the pump will stop. This means that the unit has cooled down and requires re-heating, the pump will not operate whilst the heater is on and the switch will illuminate when the machine is again ready to use.
2. Often check whether there has enough fog liquid in machine. The operation will make big damage to the machine if there has no fog liquid.
3. If the fog output is low, the unit makes an unusual noise or there is no fog output at all, please power off and check fog liquid, fuse and power plug. If the problem hasn't been solved after checking these parts, send it back to your dealer for repair.

Repair:

Please clean the fog machine regularly to avoid problems. Close the cap of the fluid tank thoroughly after filling in fog liquid.

After about 40 hours continually use, please use 80% distilled water and 20% vinegar to remove the dirt in the nozzle. Let the unit cool down. Disassemble the nozzle and use vinegar and a pipe cleaner to clean it. Make sure that the unit is unobstructed.

Empty the tank and fill in cleaning fluid. Plug the unit into a wall outlet and heat it up as usually.
Run it in a well-ventilated place until the tank is empty.

Replace the nozzle. Unplug the unit and fill it with normal fog fluid..

Others:

Clean timely to extend the lifespan of machine. Use dry cloths to clean machine and keep dry while store.

	SFP400	SFP400 LED
Voltage	230V AC	230V AC
Power	400 W	400 W
